WORK EXPERIENCE

Systems Administrator

Gotham Greens

Brooklyn, NY

Oct 2019 – Dec 2021

- Administered the company network, servers, and Azure infrastructure in a hybrid environment as the sole systems administrator
- Managed all IT security concerns for a 500 person organization lacking dedicated security staff
- Unified around Azure AD as an identity provider, deployed SAML authentication wherever supported, and extended Azure MFA to VPN connections via the Azure AD NPS extension
- Implemented Azure Sentinel to consolidate security monitoring for a variety of sources, including endpoints, perimeter devices, Azure AD, servers, and IPS
- Deployed, managed, and monitored core security controls including patch management, SIEM, IDS, EDR, and vulnerability management
- Authored documentation on IT policies and procedures for use by IT staff and other company stakeholders
- Maintained vendor relationships, researched and evaluated products, and recommended potential solutions
- Developed security awareness trainings on password hygiene and anti-phishing
- Configured and maintained a CentOS host for log consolidation (syslog) and infrastructure monitoring using Grafana
- Leveraged prior company experience as the technical lead on data warehousing projects for greenhouse climate data and crop yield data (using Python, TSQL, Microsoft SQL Server, and PowerShell)
- Led planning and migration of our ERP from a vendor's hosting environment to our own Azure-based RDS deployment

Assistant Grower & Greenhouse Supervisor

Gotham Greens

Brooklyn, NY

Sep 2016 – Sep 2019
